

Thermo Scientific Versi-Dry Surface Protectors

Protect laboratory surfaces from damage and contamination

Thermo Scientific™ Versi-Dry™ Surface Protectors can help make your lab a safer place by quickly absorbing spills and cushioning breakable labware. Use Versi-Dry material as a bench protector, shelf liner, cabinet liner or for wiping up isolated spills. The skid-resistant polyethylene backing protects your benchtop and other lab surfaces from damage and contamination caused by liquid drips and spills. The cloth-like top layer is long-lasting and will not fall apart, even when wet.

Thermo Scientific Versi-Dry Surface Protectors

- Thousands of Thirsty-Cells™ quilted into the surface quickly absorb spills. Available in white regular absorbency (750ml/m²) or blue super absorbency (1,050 ml/m²)
- Cushioned surface minimizes breakage of fragile glassware when dropped or tipped over
- Low-pile sheets lie flat and are skid-resistant helping to stabilize labware and prevent tipping
- Remains flat and won't curl up or warp with repeated wetting and drying
- Polyethylene backing prevents chemicals from breaking through to protected surfaces beneath

Versi-Dry resists the following chemical spills:

Acetone	Hydrofluoric Acid, 10%*	Potassium Hydroxide, 30%*
Ammonium Hydroxide, 30%*	Methylene Chloride	Sulfuric Acid, 10%
Chlorine Bleach	Methyl Ethyl Ketone (MEK)	Sodium Hydroxide, 10N*
Chlorobenzene	Methyl Iso Butyl Ketone (MIBK)	Toluene
Chloroform	Mineral Spirits	Xylene
Ethanolamine	Nitric Acid, 10%*	
Hydrochloric Acid, 10%*	Phosphoric Acid, 10%*
